Sprint Waste Services Receives Top Fleet Honors from Samsara

Annual Award Recognizes Safest Fleet

HOUSTON (July 20, 2020) — Sprint Waste Services LP, a leading regional provider of industrial and commercial waste management services, today announced the company has been recognized by Samsara with the 2020 Top Fleet Award for Safest Fleet. The annual award recognizes fleets that demonstrate excellence in their field and are using Samsara’s fleet management platform to innovate across five different categories: Safest Fleet, Best Fleet for Drivers, Fleet Innovator, Excellence in Performance, and Excellence in Public Fleet Management.

Sprint Waste Services was chosen top fleet in the competitive Safest Fleet category after implementing and demonstrating impressive safety improvements across our entire organization using Samsara dash cams in its 350-truck fleet, in addition to owner-operator vehicles. After using Samsara’s dash-cam technology for the first 12 months, Sprint Waste President Dave Nelson said the company was able to decrease speeding, increase miles per safety incident, and save in annual insurance renewals after decreasing accident frequency and severity, not to mention millions of dollars in untold liability saved when videos were used to exonerate Sprint Waste drivers.

“We are humbled and honored to receive this award for safety from Samsara,” said Sprint Waste Services President Dave Nelson. “Dashboard-mounted video technology has been a game-changer across our fleet, giving our drivers and mechanics a positive focus for training, learning and improvement. This award is validation and recognition for a job well done across our entire organization. I’m grateful to our dedicated drivers and owner-operators, shop and mechanics teams, safety and support teams, branch operations staff and support at Samsara for contributing our success.”

Samsara said its Safest Fleet Award is given to a customer that is using dash cam technology to improve safety both within their workforce, and within the communities they serve. Recognition in this category demonstrates the lasting impact dash cams have had on a fleet’s safety, with significant improvements in accident frequency and severity, risky behavior (like speeding), and associated costs.

“We’re continuously inspired by the leadership our customers, like Sprint Waste, have shown this year, especially given the unprecedented challenges of the past six months,” said Samsara Executive Vice President of Products and Marketing Kiren Sekar. “This year’s Top Fleets winners set the standard for fleets, and exemplify innovation on the road. We’re excited to partner even further as we develop new technologies to help fleets improve efficiency, boost their bottom line and keep their drivers safe.”

Nelson looks forward to attaining new safety goals with the dash cams. “When it comes to our safety culture at Sprint Waste, we guard against complacency and never rest on our laurels,” he said. “We’re already setting new and higher goals based on additional capabilities of the real-time data provided by our dash-cam technology. We’re can’t wait to see where our partnership with Samsara leads.”

About Sprint Waste Services

Sprint Waste Services LP is a premier, full-service provider of solid waste and environmental services to commercial, industrial and large manufacturing companies along the Gulf Coast. Since 2006 the company has provided waste collection, equipment rentals, hauling and turnkey managed solutions across enterprises from small industrial centers and construction sites to the world’s largest energy companies. Today the company’s more than 600 employees at 14 locations help customers handle their entire waste stream in a safe, efficient, cost-effective and environmentally responsible way.
