

## Don't Trust Just Any Transporter with Your Hazardous Waste Needs

Not all trucking companies are created equally. Sprint Waste's management has been operating within the solid waste industry for more than 30 years, and we've built our reputation by offering the safest, most responsive waste hauling service in the business. From our management team down to our qualified, professional drivers, we are steadfastly committed to safely transporting our customers' waste hauls to their destinations—on time and incident free.

## Liquid and Solid Waste Hauling Services

Scale matters when you need flexible, last-minute service

### One of the Largest Hazardous Waste Haulers on the Gulf Coast

Sprint Waste safely hauls hundreds of loads daily, and our Federal Motor Carrier Safety Administration (FMCSA) scores are significantly below industry thresholds.

Sprint Waste is approved to haul in all 48 contiguous U.S. states. Within Louisiana, Sprint Waste maintains a current Public Service Commission waste hauling permit and is the only solid waste company offering a full line of container rental equipment, combined with the ability to provide permitted waste hauling services.

# Safety Is our Top Priority

## Don't Waste Your Time Getting the Runaround

Most large solid waste companies want your waste at their landfill, regardless of whether it is the best option for your particular waste profile. When you call, you'll likely reach a regional dispatcher who might not even be in your time zone. And if you have a problem, be prepared to wait as you get transferred from department to department.

Sprint Waste has a better solution.

## Sprint Waste Is First and Foremost a *Service* Company

As a family-owned and -operated company you get a local dispatcher or customer service rep—every time you call.

Plus, Sprint Waste has one of the largest hazardous and nonhazardous hauling fleets within the areas it operates and one of the largest container rental fleets. Services we provide:

- Rolloff shipments of haz/nonhaz waste
- Box van shipments of haz/nonhaz drum waste
- Front-end-load industrial trash service
- End-dump trailer shipments
- Vacuum trailer shipments of sludge waste
- Pneumatic tanker shipments
- Flatbed/flo-bin shipments of spent catalyst
- Container washouts

## One Hauler, Any Disposal Option

Don't be locked into one disposal site because of your hauler. Get the lowest price on your disposal for each and every haul. You can negotiate with each disposal site to get the best rate possible. Sprint Waste hauls to all of them.

Because of our scale in waste hauling, we are able to provide flexible service and the most competitive hauling rates for your hazardous or nonhazardous loads.
